

Dear Sir:We bought a truck with satellite radio not knowing what we were getting. Since that time approx. 8 mos. ago, we are so pleased with it that we are planning on getting it for our other car, since we're lost without it. We live in a rural area with virtually no radio available and when a station is picked up it fades out when driving short distances. Getting weather or traffic or anything, really, is nearly impossible in this area.

We urge you to reject the NAB's petition 04-160 and support XM's ability to provide us with the Instant traffic & weather and other programming we have come to depend on.

Thank you for listening.

Barbara Miller
